

I first came to Nadeau Chiropractic & Wellness Center about 5 years ago. I had suffered from various ailments for most of my adult life. Since becoming a patient I have experienced tremendous improvement in the quality of my life and a boost in my ability to do the activities that I enjoy.

It's hard to remember, but I think I've been suffering for around 40 years. I had pain all over my body. There were times when I couldn't imagine the pain any worse. I experienced constant pain 24 hours a day. In fact, I didn't know what it was like not to feel pain. Since being a patient here this is first time in 7 years that I can say I feel good and actually smile and mean it.

I have seen other chiropractors and medical doctors but none of them have been Applied Kinesiologists. None of them took care of the problem like Dr. Nadeau. In the past I was prescribed various pain killers and muscle relaxants for the majority of the 40 years but none of them would resolve the problem itself so the pain would always be in the back ground waiting to come back. I decided to go to the chiropractor after a stay in the hospital did not relieve my pain. After leaving the hospital I felt hopeless and knew that I had to try something different. I had been to another chiropractor for one year before coming to Nadeau Chiropractic & Wellness Center but I didn't get the same results.

When I arrived at Nadeau Chiropractic clinic I was impressed with the quality of the staff and the level of service they provided. Dr. Nadeau took care to treat me as a whole person by addressing external as well as internal health concerns. Among other recommendations Dr. Nadeau had for me, he gave me a nutritional supplement to support my kidney function which may have kept me from needing dialysis. Within a very short period of time I noticed myself more rejuvenated and able to do more daily work around the house.

I have been so happy with the care at Nadeau Chiropractic and Wellness Center that I've made many referrals including sending members of my own family. I would recommend that anyone see a chiropractor who is trained in Applied Kinesiology. It is especially important for anyone suffering from longstanding or unresolved symptoms. It's unbelievable what Applied Kinesiology and Chiropractic can do. I was on the verge of death before I came here and now I have my life back. Thank you to Dr. Andre Nadeau and all of the wonderful people at Nadeau Chiropractic Wellness Center.

Sincerely,

Bunny Trepanier
